Surname: _____ First name: _____

Registration number: _____

Study programme: _____

Signed declaration of independence in accordance with
Part A of the examination regulations and the use of
Artificial Intelligence systems at the Jade University
Wilhelmshaven/ Oldenburg/ Elsfleth

This master's thesis or work written as part of another examination is *(please tick the relevant box)*

☐ an individual work

☐ a group work in collaboration with the following student(s)

_____.

1. Herewith I declare, that I have,

    a) written the examination myself independently or the parts of the text marked accordingly in the case of group work, not used any other information other than referenced according to the specified sources and tools,
    b) marked all parts of the work that were obtained from other sources either verbatim or accordingly as such and
    c) not submitted the text in the same or similar form in any other examination proceedings in the country or abroad at any other university.

2. In accordance with the agreement made with the first examiner regarding the use of generative Artificial Intelligence (AI) systems, I provide the following declaration.
    (please tick the relevant box)

☐ **1. Prohibition to use generative AI systems**
    I declare, that I have not used any generative AI systems during the writing of this work.

☐ **2. Permission to use generative AI systems with documentation requirements**
    I am fully responsible for the adoption of any output from the generative AI systems I have used.

I have marked all outputs generated by AI systems that I have used directly or indirectly.
In the appendix "Documentation of the use of generative AI systems" of this work, I have explained which generative AI systems I have used, for what purpose I have used them and how they were used.

☐ **3. Requirement to use generative AI systems with documentation requirements**
I declare that I have used the tools of generative AI systems as explicitly specified by the first examiner and I have indicated all content and texts or other forms of representation (outputs) generated by AI systems.
I am aware that the use of generative AI systems does not guarantee the quality of the outputs.
I am fully responsible for the adoption of any output from the generative AI systems I have used.
In the appendix "Documentation of the use of generative AI systems" of this work, I have explained to the full extent which generative AI systems I have used, for what purpose I have used which systems and and how these systems were used.

I am aware that untruthful information will be treated as plagiarism and attempted fraud.
